Development board: Jetson Orin series mainboard

Note: Due to performance limitations, the Jetson Orin Nano 4GB needs to run the small-parameter version. The 8B model of qwen cannot be used on Jetson Orin Nano 8GB and lower memory

Qwen 3 is the latest generation of large language models in the Qwen series, providing a complete set of dense and mixture-of-experts (MoE) models.

1. Model Size

Model	Size
qwen3:0.6b	523MB
qwen3:1.7b	1.4GB
qwen3:4b	2.6GB
qwen3:8b	5.2GB

2. Performance

BFCL v3	69.1	66.4	65.9	63.4	59.1	57.6	72.5
MultiIF 8 Languages	72.2	68.3	66.3	65.3	69.8	55.6	65.6

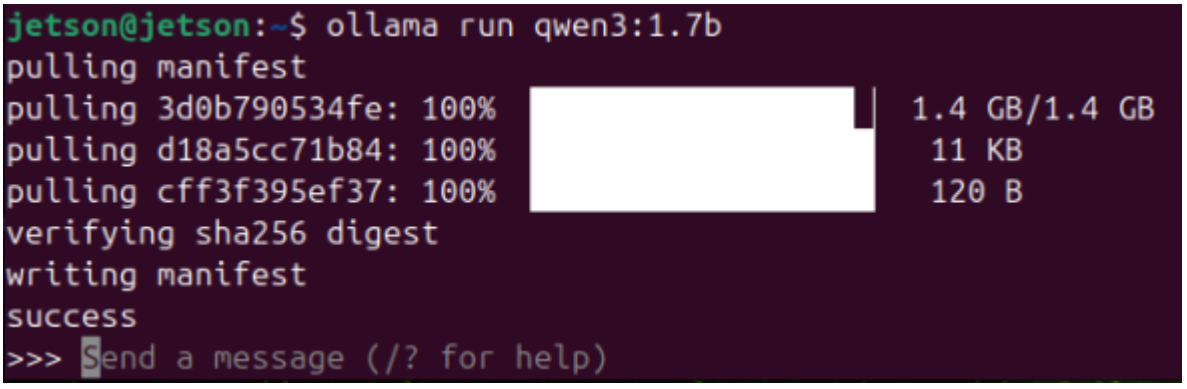

1. AIME 24/25: We sample 64 times for each query and report the average of the accuracy. AIME'25 consists of Part I and Part II, with a total of 30 questions.
2. Aider: We didn't activate the think mode of Qwen3 to balance efficiency and effectiveness.
3. BFCL: The Qwen3 models are evaluated using the FC format, while the baseline models are assessed using the highest scores obtained from either the FC or prompt formats.

3. Using Qwen3

3.1. Running Qwen3

Run the model with the run command; if it is not downloaded yet, Ollama pulls it automatically:

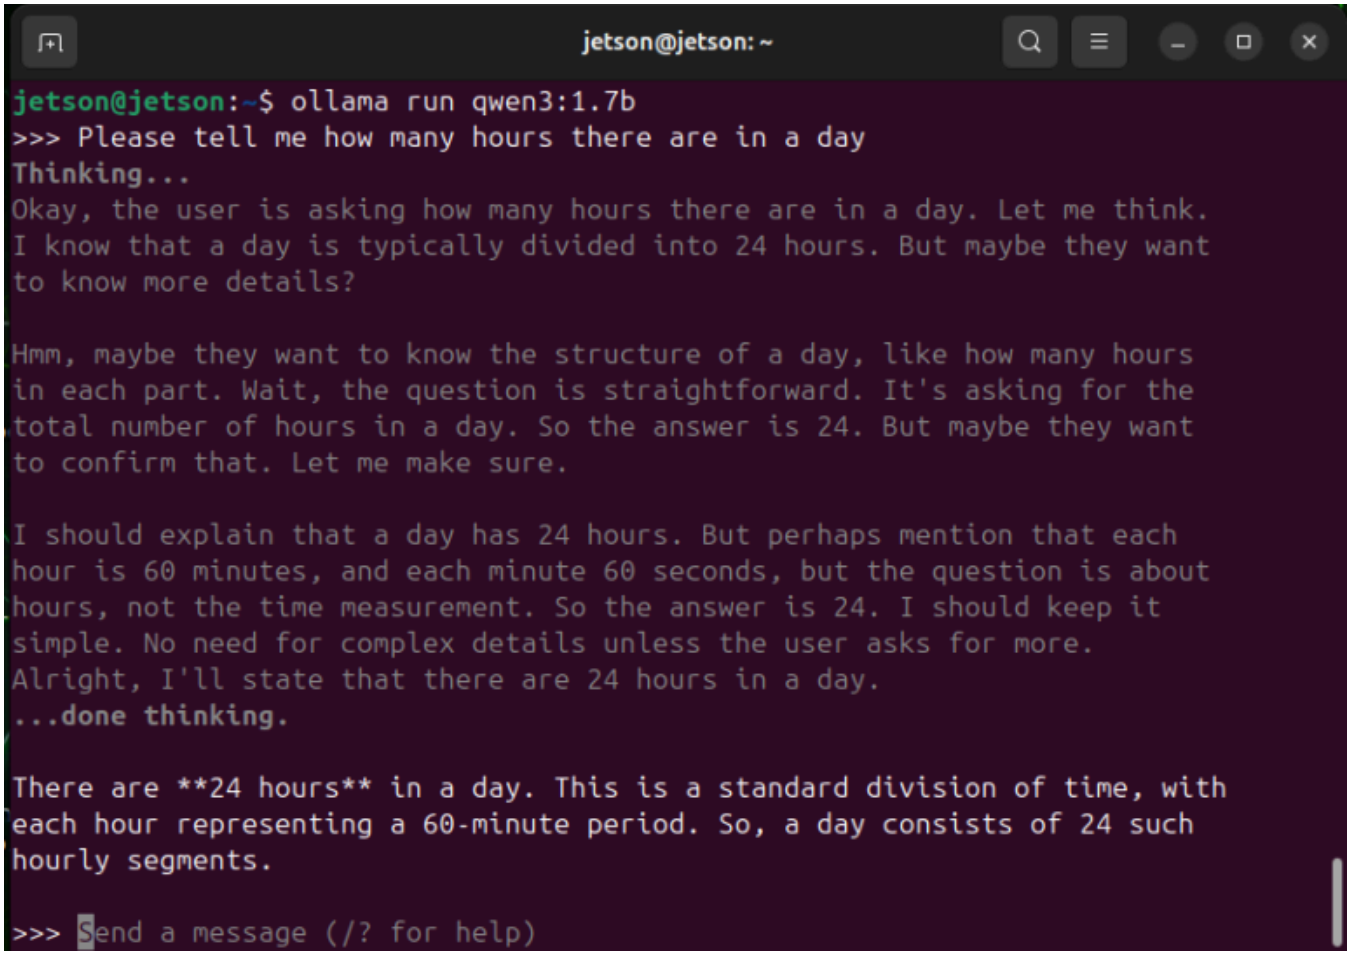

```
ollama run qwen3:1.7b
```

3.2. Starting a Conversation

```
Please tell me how many hours there are in a day
```

Response time depends on the hardware; please be patient.

3.3. Ending the Conversation

Use the `Ctrl+d` shortcut or `/bye` to end the conversation!
