Development board: Jetson Orin series mainboard

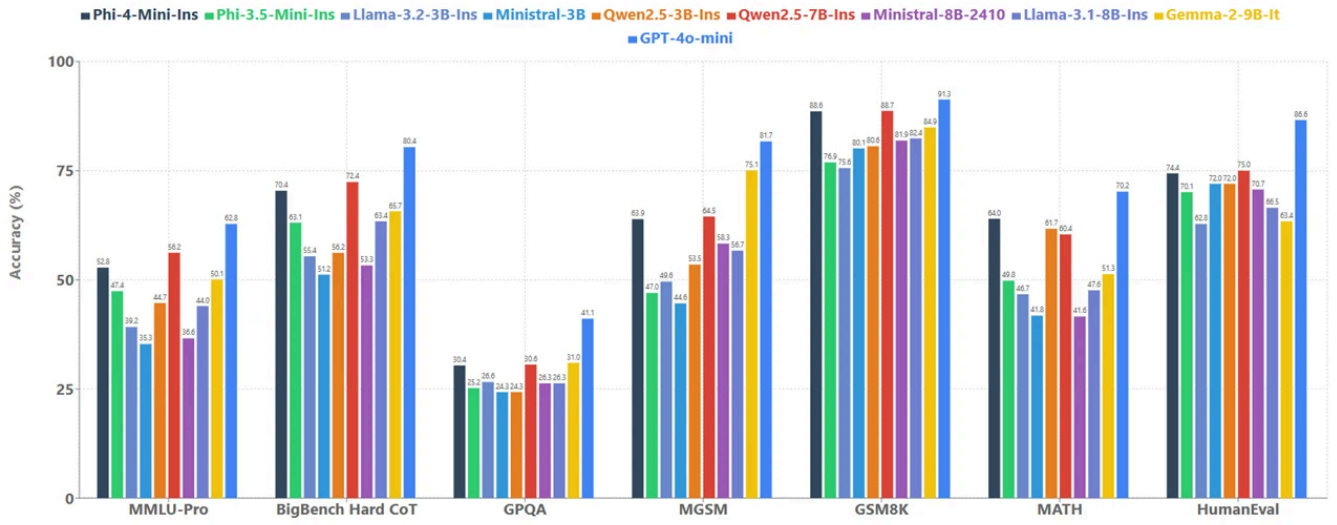

Note: Due to performance limitations, the Jetson Orin Nano 4GB cannot run this model.

Phi-4-mini-instruct is a lightweight open model built on synthetic data and curated public websites, focusing on high-quality, reasoning-dense data.

1. Model Size

Model	Size
phi4-mini:3.8b	2.5GB

2. Performance

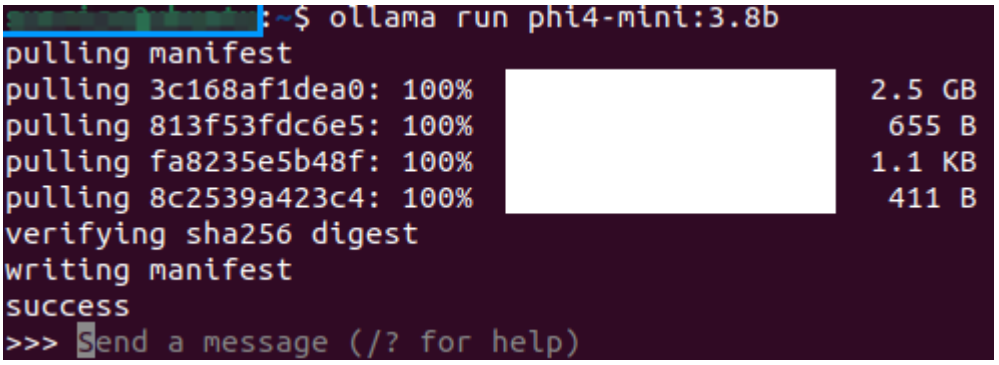

3. Using Phi4-mini

3.1 Running Phi4-mini

Run the model with the run command; if it is not downloaded yet, Ollama pulls it automatically:

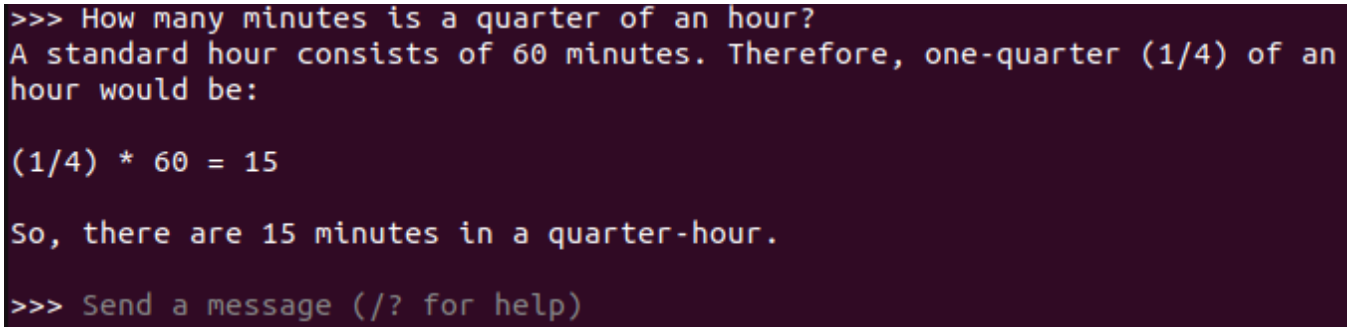

```
ollama run phi4-mini:3.8b
```

3.2 Starting a Conversation

```
How many minutes is a quarter of an hour?
```

Response time depends on the hardware; please be patient.

3.3 Ending the Conversation

Use the `Ctrl+d` shortcut or `/bye` to end the conversation!
