Development board: Jetson Orin series mainboard

Note: Due to performance limitations, the Jetson Orin Nano 4GB cannot run this model.

1. Model Size

Model	Size
llava:7b	4.7GB

2. Performance

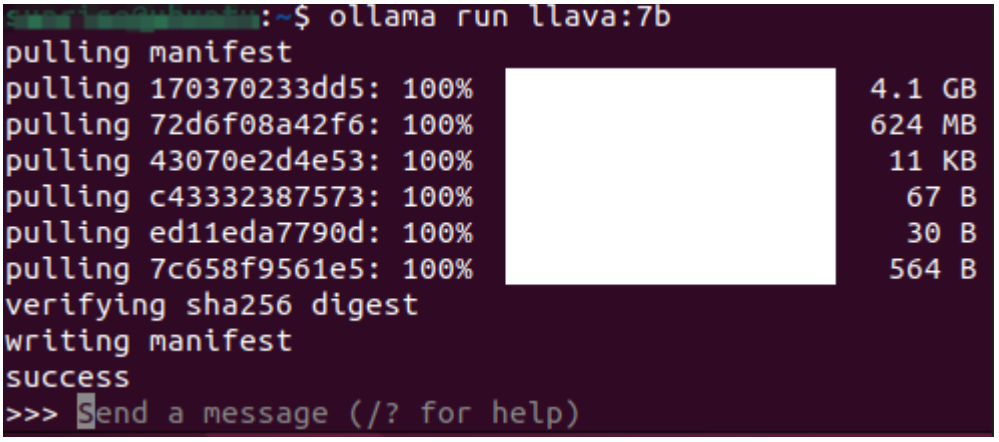

3. Using Llava

3.1 Running Llava

Run the model with the run command; if it is not downloaded yet, Ollama pulls it automatically:

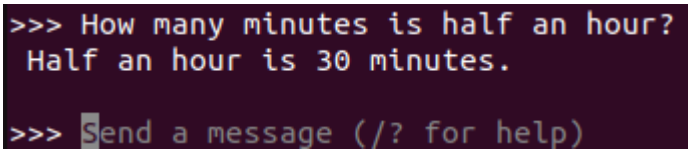

```
ollama run llava:7b
```

3.2 Starting a Conversation

```
How many minutes is half an hour?
```

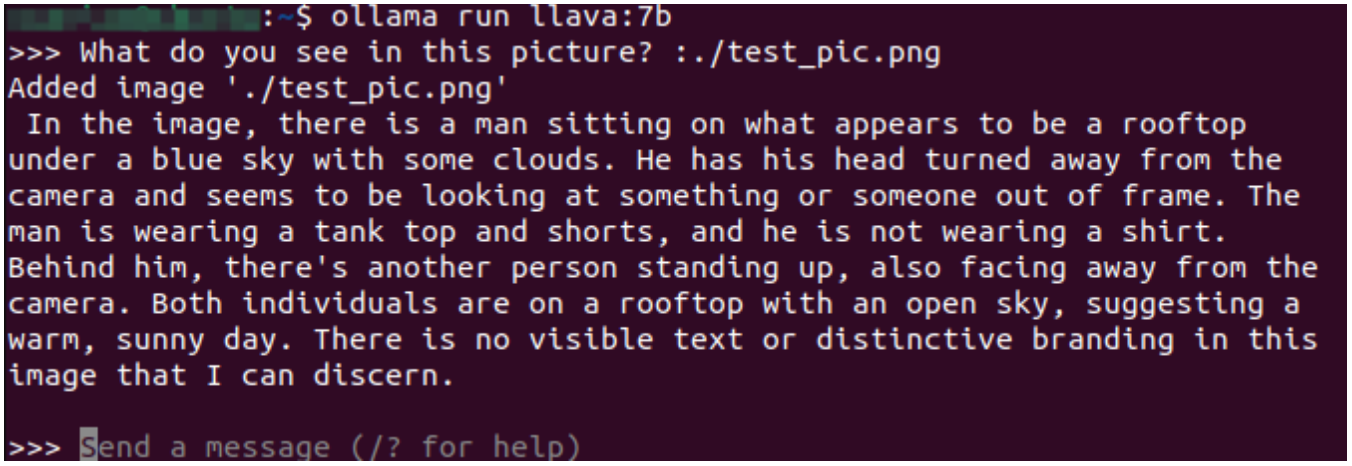

Response time depends on the hardware; please be patient.

3.3 Visual Function

```
What do you see in this picture? ./test_pic.png
#Use ": + image path" in the conversation to enable the model to use its visual function and interpret the information in the image
```

3.4 Ending the Conversation

Use the `Ctrl+d` shortcut or `/bye` to end the conversation!
